- ❖ Vietnamese (Proficient)
- ❖ English (Upper intermediate)

Currently a fourth-year Software Engineering student at Duy Tan University. Experienced in various development technologies for desktop applications, websites, and embedded systems. Proficient in relevant programming languages and development tools. Effective in both team-based and self-managed projects, with willingness for self-study. Seeking internship opportunities within the field of Software Engineering.

EXPERIENCE

Web Developer - Internship

DAC Data Technology Vietnam   *11/2024 – 02/2025*

- ➢ Training on company business, web development, and SQL.
- ➢ Developing a website using Laravel, ReactJS, Python, and MySQL.

Software Developer

SmartDev   *06/2023 – 09/2023*

- ➢ Maintaining the VeryPay System, ensuring stability and performance.

Kernel Developer

Makati, National Capital Region, Philippines   *08/2023 – 01/2025*

- ➢ Developing an OS using Linux Kernel.

EDUCATION

Bachelor of Software Engineering – CMU

Duy Tan University   *08/2021 – 06/2025*

- ➢ Learning the foundations of software engineering.
- ➢ Using programming languages/frameworks to develop applications.
- ➢ Improving soft skills through group projects, encouraged self-learning.
- ➢ GPA: 3.2

IT Support Specialization

Google   *04/2024 – 05/2024*

- ➢ Learning how to provide end-to-end customer support, ranging from identifying problems to troubleshooting.
- ➢ Specializing in Linux, Domain Name Systems, Command-Line Interface, and Binary Code.

Project Management Specialization
Google   *04/2024 – 05/2024*

- ➤ Foundations of Agile project management with a focus on Scrum events, artifacts, and roles.
- ➤ Practice strategic communication, problem-solving, and stakeholder management.

IT Automation with Python Specialization
Google   *04/2024 – 05/2024*

- ➤ Manage IT resources at scale, both for physical machines and virtual machines in the cloud.
- ➤ Analysing real-world IT problems and implement appropriate strategies to solve them.

PROJECTS

E-Learning Website
DAC Data Technology Vietnam   *11/2024 – 02/2025*

- ➤ Using Laravel, ReactJS, and MySQL to create a website connecting between course providers and students.
- ➤ Using Python to create an API to generate transcripts from videos and improve it by integrate Gemini AI.

Career Predict Model
Duy Tan University   *09/2024 – 12/2025*

- ➤ Using Python and Random Forest Classifier to a career predict model.
- ➤ Making a long side with NavCareer.

NavCareer
Duy Tan University   *09/2024 – 12/2025*

- ➤ Using NodeJS and ReactJS to create an e-learning page.
- ➤ Training an AI Model to predict suitable career.
- ➤ Project leader, collaboration with other 4 students.

Databases Integration Website
Duy Tan University   *02/2024 – 05/2024*

- ➤ Using NodeJS to create dashboard for 2 legacy systems.
- ➤ Project leader, collaboration with other 4 students.

Aquifer OS
Makati, National Capital Region, Philippines   *08/2022 – 01/2025*

- ➤ Designing, programming, and deploying the Kernel with a team of software engineers from the Philippines, Indonesia, and Vietnam.
